

1 **(January 5, 2004)**

2 **Price Adjustment for Quality of HMA**

3 The first paragraph of Section 5-04.5(1)A is revised to read:

4
5 Statistical analysis of quality of gradation, asphalt content and volumetric properties
6 will be performed based on Section 1-06.2 using the following price adjustment
7 factors:

8
9 **Table of Price Adjustment Factors**

Constituent	Factor "f"
VMA (Voids in mineral aggregate)	30
Va (Air Voids)	30
All aggregate passing 12.5 mm	2
All aggregate passing 9.5 mm	2
All aggregate passing 4.75 mm	2
All aggregate passing 2.36 mm	15
All aggregate passing 0.075 mm	15
Asphalt Binder Content	30

10
11
12
13
14
15
16
17
18
19
20 The first two sentences of the second paragraph are revised to read:

21
22 A pay factor will be calculated for sieves listed as a control point for the class of
23 HMA, for the asphalt binder and volumetric properties (VMA and Va).
